Journal of Critical Care Editorial Board - Elsevier

Feeding tubes (FTs) are commonly used for nutritional support and medication delivery in acutely and critically ill patients. Verification of physiologic positioning, known as placement verification, of FTs is an important concern for bedside practitioners.

Offers a current and comprehensive review of the pathophysiology, diagnosis, and treatment of pulmonary hypertension and venous thromboembolism. Discusses in depth the pharmacologic and non-pharmacologic therapies used in the treatment of pulmonary vascular disease -- including the benefits and risks of each -- allowing for more informed care decisions.

This long-awaited new edition of the 1986 AJN Book of the Year Award Winner has been completely revised and updated. It preserves the format of the original and adds new material on case study methods, study proposals and formats, ethical considerations, institutional review concerns, and the dialect of qualitative and quantitative methods. This book is essential for courses on nursing research, and indispensable for researchers conducting qualitative studies.

What began as a compilation of author notes from a real critical care hospital practice setting is now a pocket-sized powerhouse for critical care nurses and students! Quick Reference to Critical Care, 4th edition, provides thoroughly updated critical care content and updated cross-references with page numbers for even quicker reference and ease of use. Information is organized by body system, with each part presented alphabetically for fast, easy access. Full of fast facts, mnemonics, and over 200 images and tables!

This book helps adult nursing students to competently manage care of critically and acutely ill patients, and to recognize and deal with the early signs of deterioration. The book takes a practical real-life approach to care, with each chapter focusing on patients with specific problems, then interweaving the knowledge and skills needed to care for that patient. New to this edition: · two new chapters focusing on the renal system and endocrine system · updates to include the latest evidence and guidelines from NICE · refreshed activities and scenarios reflecting current nursing practice.

Provides detailed coverage of a number of specialty areas within critical care nursing including intensive care, emergency nursing, cardiac nursing, neuroscience nursing and acute care. It will encourage students to be reflective practitioners, ethical decision makers and providers of evidence based care.

From the experts at the American Association of Critical-Care Nurses (AACN) comes the definitive resource for critical care certification and clinical practice. This new seventh edition has been thoroughly updated to reflect the current state of high acuity, progressive, and critical care nursing practice and includes expanded coverage of pain management, palliative care, and end-of-life care; transplantation; and key AACN initiatives. It also reflects the most current literature, national and international guidelines, clinical studies, and of course, the newest content on the CCRN® exam. Authored by the experts at the American Association of Critical-Care Nurses (AACN), this is the definitive guide to critical care nursing certification and clinical practice. NEW! Significantly updated content corresponds to the most recent CCRN® examination blueprint and reflects the most current literature, national and international guidelines, clinical studies, AACN/ANA scope of practice, and ECCO 3.0. NEW! Expanded coverage of key content reflects the healthcare needs of today's patients, including pain management, palliative care, and end-of-life care; nutritional support; transplantation; and key AACN initiatives. Concise outline format is organized by body system to make information easy to digest. NEW! Clinical Pearls and Key Concepts boxes highlight key content and serve as a convenient quick reference. NEW! Improved navigation includes printed index tabs to help distinguish chapters and find information fast. Basic to advanced levels of coverage, with an emphasis on clinical nursing practice, prepare you for the full range of knowledge you will encounter on the CCRN exam and in practice. Coverage of the AACN Synergy Model is featured in the new opening chapter. Professional Care and Ethical Practice is integrated into the Core Curriculum series framework. A new chapter on Critical Care Patients with Special Needs includes bariatric and geriatric patients in critical care, as well as high-risk obstetric patients. Features new content on chest tubes, liver transplantation for acute liver failure, spirituality, and spiritual aspects of care. Integrates pain as the 5th vital sign and includes JCAHO, HCFA, and AHCPR guidelines relating to pain management. Features

AHRQ evidence-based practice guidelines as reference sources for practice interventions. New organization for Patient Care presents patient problems, needs, etc. in order of clinical priority. Expanded Nursing Interventions includes considerations related to patient/family education, patient transfer, and discharge planning. Web-based resources for CDC, AHA, NINR, National Guideline Clearinghouse, NIH Consensus Conference Proceedings, ADA.

Here's the essential information you need to know in critical care nursing - all in one concise text! Using a to-the-point, reader friendly approach, *Introduction to Critical Care Nursing, 5th Edition*, provides authoritative, real-world information on the important concepts of critical care nursing and the assessment and technical skills associated with the management of critically ill patients. The latest content on the technology makes it easy to learn and understand how to use the equipment you'll use in the field. Nursing care chapters are organized according to the nursing process framework, and you'll find detailed nursing care plans in every management chapter. Case studies and critical thinking questions challenge you to apply what you've learned, and user-friendly features throughout the text (updated pharmacology tables, clinical and laboratory alerts, and evidence-based practice boxes) help you bridge the gap between concepts and clinical practice. Nursing Care Plans provide nursing diagnoses, expected patient outcomes, and interventions with rationales to prepare you for clinical practice. Case Studies challenge you to apply concepts from the book to real-life patient situations to test their critical thinking skills. Streamlined and updated Pharmacology Tables detail the actions, indications, dosages and routes, and side effects of commonly used critical care drugs. Clinical Alerts promote optimal patient safety and outcomes by highlighting potential problems and concerns in the clinical setting. Laboratory Alerts discuss both common and cutting-edge tests and procedures, emphasizing the importance of laboratory test results to critical nursing care. Critical Thinking Questions in every chapter encourage you to use and reinforce the concepts presented throughout the chapter. Now full-color throughout, new, vibrant artwork and anatomical images are in true-to-life color. A new chapter on end-of-life care covers ethical and legal matters, palliative care, withholding of therapies, and communication issues - all essential concerns confronting today's critical care nurse. New features on evidence-based practice, genetics, transplantation, and geriatric considerations offer realistic, easy-to-understand information on some of the most important and rapidly changing topics in critical care today.
