INSPECTION AND TESTING FORM - NFPA

Technicians must check waterflow switches, tamper switches, and supervisory devices when servicing the fire alarm system. This typically adds at least 20% to the cost of fire alarm inspection and testing. Other devices take longer to service so they're more expensive than basic devices. These inspections and tests include smoke detector sensitivity, duct detector, vesda, ir detector, and gas detector. Additionally, facilities with elevators require special inspection and testing.

The NFPA 72®: Inspection, Testing, and Maintenance of Fire Alarm Systems Online Training is a building block of the CFPE Learning Path and CFI-I Learning Path a series of web-based training that can help you plot a successful journey to advanced certification.

NFPA 72®: Inspection, Testing, and Maintenance of Fire ...

To inspect and test the fire alarms, it takes a team of two technicians. The first technician is stationed at the fire alarm panel, while the second technician goes from floor to floor inspecting and testing the smoke detectors, fire alarm pull stations, and the fire alarm horns & strobes. The technician at the fire panel checks to see that the fire alarm panel is activated when a smoke detector or fire alarm pull station is activated.

What is the Fire Alarm Inspection Process?

Fire alarm inspections and tests are necessary to ensure that all existing alarms are compliant with NFPA 72, the National Fire Alarm and Signaling Code. These inspections may also reveal areas of a building's fire signaling system in need of repairs or replacement.

What Should I Expect During a Fire Alarm Inspection and Test?

"To engage in the business of installing, servicing or maintaining security or fire alarm systems" means and refers to a person who holds himself out directly or indirectly, as being able, or who offers or undertakes, by any means or method, to install, service or maintain a security or fire alarm system to detect intrusion, break-in, movement, sound or fire.

NYS Division of Licensing Services

The inspection, testing and maintenance requirements that apply to your building's fire alarm system start from the date of initial installation and continue on at specific intervals throughout the life of the system. What follows is a brief synopsis of some of the major requirements you need to be aware of. Page 3 of 8 June, 2016

This book is an introductory outline of NFPA 72, 2010 edition based upon the National Fire Protection Association training seminar in Fire Alarm Inspection and Testing given in December 2009. This book concentrates on Inspections as opposed to Testing and gives a foundation in the NFPA 72, 2010 edition of the National Fire Alarm Code book for Inspections as a separate job function. The purpose of this book is to clarify to other inspectors, managers, customers, and authorities having jurisdiction; when to inspect and when to test; based upon the National Fire Protection Association training seminar in December 2009.

Fire Alarm Inspection Log Book will cover most any alarm testing needs, in a clean and easy to use for safety maintenance & location records within your premises. This Fire Alarm Log Book Conforms to the requirements of current Fire Safety Legislation. The logbook has a place to enter all the necessary information that will allow you to record your observations and conclusions to ensure the highest level of security. Perfect for: landlords, businesses, schools, sites & much more. Record: Date Location Serial No. Alarm Checks Action Required Action Taken Inspection Time Inspected by Additional Comments/Notes Features: Glossy Cover, Paperback 120 pages Spacious 8" x 10" size Printed on high Quality White Paper Click the cover to see what's inside!
