Best friends Jeff and Wiley are legends. There is practically no one in their school who hasn't been nicknamed by the duo. They've dubbed their own underachieving class "The Dim Bulbs"; their pop-eyed principal is better known as "Deer in Headlights"; and their enormous new English teacher, Mr. Hughes, is "Mr. Huge." But now some of the nicknames that Jeff and Wiley have invented are backfiring on them. Will the duo be able to get it together before it's too late?

Humans, especially children, are naturally curious. Yet, people often balk at the thought of learning science—the “eyes glazed over” syndrome. Teachers may find teaching science a major challenge in an era when science ranges from the hardly imaginable quark to the distant, blazing quasar. Inquiry and the National Science Education Standards is the book that educators have been waiting for—a practical guide to teaching inquiry and teaching through inquiry, as recommended by the National Science Education Standards. This will be an important resource for educators who must help school boards, parents, and teachers understand “why we can’t teach the way we used to.” “Inquiry” refers to the diverse ways in which scientists study the natural world and in which students grasp science knowledge and the methods by which that knowledge is produced. This book explains and illustrates how inquiry helps students learn science content, master how to do science, and understand the nature of science. This book explores the dimensions of teaching and learning science as inquiry for K-12 students across a range of science topics. Detailed examples help clarify when teachers should use the inquiry-based approach and how much structure, guidance, and coaching they should provide. The book dispels myths that may have discouraged educators from the inquiry-based approach and illuminates the subtle interplay between concepts, processes, and science as it is experienced in the classroom. Inquiry and the National Science Education Standards shows how to bring the standards to life, with features such as classroom vignettes exploring different kinds of inquiries for elementary, middle, and high school and Frequently Asked Questions for teachers, responding to common concerns such as obtaining teaching supplies. Turning to assessment, the committee discusses why assessment is important, looks at existing schemes and formats, and addresses how to involve students in assessing their own learning achievements. In addition, this book discusses administrative assistance, communication with parents, appropriate teacher evaluation, and other avenues to promoting and supporting this new teaching paradigm.

A National Book Award finalist by Newbery Medalist Kate DiCamillo. Walking through the misty Florida woods one morning, twelve-year-old Rob Horton is stunned to encounter a tiger—a real-life, very large tiger—pacing back and forth in a cage. What’s more, on the same extraordinary day, he meets Sistine Bailey, a girl who shows her feelings as readily as Rob hides his. As they learn to trust each other, and ultimately, to be friends, Rob and Sistine prove that some things—like memories, and heartache, and tigers—can’t be locked up forever. Featuring a new cover illustration by Stephen Walton and an excerpt of Kate DiCamillo's newest novel, Raymie Nightingale.
