hacker community, this  
book provides business  
executives, policy-  
makers, and individuals  
with a deeper  
understanding of

The early twenty-first century has been defined by a rise in Islamist radicalisation and a concurrent rise in far right extremism.

This book explores the interaction between the 'new' far right and Islamist extremists and considers the consequences for the

global terror threat. Julia  
Ebner argues that far  
right and Islamist

extremist narratives -

'The West is at war with  
Islam' and 'Muslims are  
at war with the West' -

complement each other  
perfectly, making the  
two extremes rhetorical

allies and building a

spiralling torrent of

hatred - 'The Rage'. By

looking at extremist

movements both online and offline, she shows how far right and Islamist extremists have succeeded in penetrating each other's echo chambers as a result of their mutually useful messages. Based on first-hand interviews, this book introduces readers to the world of reciprocal radicalisation and the hotbeds of

extremism that have developed - with potentially disastrous consequences - in the UK, Europe and the US.

Osama Bin Laden is unquestionably the leader of the world's most deadly terrorist cult. He has perverted the teachings of Islam to create a fringe religious ideology, Bin Ladenism,

where only al-Qaeda speaks for God. In his cult, suicide bombing is the highest form of worship and the mass murder of Muslims proves one's devotion. Al-Qaeda's 9/11 attack on the United States was just a small part of Bin Laden's long-term strategy to win a civil war for control of Islam. By fighting his terrorists

solely with bullets and bombs and ignoring his war on Islam, we have bolstered Bin Laden's recruiting efforts abroad, undermined civil liberties and economic security at home and tarnished America's reputation internationally. Career intelligence officer Malcolm Nance proposes a quantum

Jihad Nance

The recruitment of ISIS terrorists may have begun as an extremist crusade in Iraq, but it has quickly become a global phenomenon that is taking hold of people from diverse backgrounds, cultures, and belief systems. The iconic image of a

Hacking Isis

terrorist as an old, angry, middle-eastern man is long gone. It has since been replaced by young men and women of all races and religious upbringings, in tactical gear and ski masks, carrying heavy artillery. From the outside looking into the Islamic State, most people see these men and women as nothing more than

# Access Free Hacking Isis

evil terrorists with a psychotic penchant for violence. Internally, they perceive themselves as freedom fighters or mujahedeen, who violate the laws of men to protect their community according to the will of Allah.

Ultimately, neither of these perceptions are based in reality. While some experts claim that

# Access Free Hacking Isis

terrorist recruitment is completely random, criminologist Kimberly Mehlman-Orozco has identified clear patterns which can be used to explain how regular people are being conscripted into terrorism. Using interviews with convicted terrorists, in-depth research and analysis of extremist

# Access Free Hacking Isis

propaganda, and case-specific details, Dr. Mehlman-Orozco provides nuanced theories into the methods of terrorist recruitment—methods which can be used to identify persons at high risk of being targeted. The Jihadi Next Door provides unprecedented information that can be used to actually combat

# Access Free Hacking Isis

terrorism. By laying bare the tactics used by ISIS to deceive and exploit new recruits and exposing the veneer these extremists operate under, Dr. Mehlman-Orozco hopes to empower readers with the knowledge needed to prevent future recruitment and thereby preventing acts of terrorism.
