The Fifth Assessment Report of the IPCC is the standard scientific reference on climate change for students, researchers and policy makers.

This book draws together a small selection of full-length papers based on presentations given at the 27th European Biomass Conference and Exhibition held in Lisbon, Portugal in 2019. The topics covered, which reflect the breadth of the program of the EUBCE conference itself, include biomass sources, various aspects of technologies used for the conversion of biomass to bioproducts and bioenergy, as well as different approaches to assessing environmental impacts, which include case studies based on different technologies in use in a range of countries.

Educating for Sustainable Development (ESD) approaches are holistic and interdisciplinary, values-driven, participatory, multi-method, locally relevant and emphasize critical thinking and problem-solving. This book explains how ESD approaches work in the Japanese context; their effects on different stakeholders; and their ultimate potential contribution to society in Japan. It considers ESD in both formal and informal education sectors, recognizing that even when classroom learning takes place it must be place-based and predicated on a specific community context. The book explores not only 'Why ESD', but why and how ESD in Japan has gained importance in the past decade and more recently in the wake of the triple disaster of March 2011. It considers how ESD can help Japan recover and adapt to disasters and take initiative in building more resilient and sustainable communities. This volume asks the questions: What are some examples of positive contributions by ESD to sustainability in Japan? What is the role of ESD in Japan in activating people to demand and work towards change? How can schools, universities and non-governmental organizations link with communities to strengthen civic awareness and community action? After an introduction that elucidates the roots and recent promotion of ESD in Japan, part one of this volume looks at the formal education sector in Japan, while part two examines community-based education and sustainability initiatives. The latter revisits the Tohoku region five years on from the events of March 2011, to explore recovery and revitalization efforts by schools, NGOs and residents. This is an invaluable book for postgraduate students, researchers, teachers and policy makers working on ESD.

The official Statutes and Ordinances of the University of Cambridge.

The new edition of the book Study Guide for CTET Paper 2 - English 4th edition (Class 6 - 8 Social Studies/ Social Science teachers), has been updated with the CTET Solved Papers of July 2013 to Sep 2018. • The languages covered in the book are English (1st language) and Hindi (2nd language). • The book provides separate sections for Child Development & Pedagogy, English Language, Hindi Language and Social Studies/ Social Science. • Each section has been divided into chapters. For each chapter an exhaustive theory has been provided which covers the complete syllabus as prescribed by the CBSE/ NCERT/ NCF 2005. • This is followed by 2 sets of exercise. • The exercise 1 contains a set of MCQs from the PREVIOUS YEAR Question Papers of CTET and various STET's. • The exercise 2, "TEST YOURSELF" provides carefully selected MCQs for practice. • The book is a must for all the candidates appearing in the Paper 2, Social Studies stream of the CTET and State TETs like UPTET, Rajasthan TET, Haryana TET, Bihar TET, Uttarakhand TET, Punjab TET, Tamil Nadu TET etc.

In June 2015 we held a workshop on the beautiful island of Mallorca, Spain with a focus on sea level variability and change. Over 120 sea level experts from around the world attended this workshop, from a range of different disciplines. The main aims of the workshop were to: 1.) Evaluate the current state-of-knowledge of sea level science; 2.) Identify gaps and unresolved questions in any aspect of sea level science; and 3.) Design future research to address these issue. All aspects of sea level changes were covered, from global to regional, observations and modelling, processes driving mean sea level changes and extremes, from the geological scale to the instrumental era and future projections and including impacts on the coastal zones. This E-Book presents papers that came out of that workshop. Overall, these papers illustrate the multi-disciplinary nature of sea level research, cross-cutting many fields of research including: oceanography, meteorology, geology, coastal morphodynamics, engineering and the social-economic aspects. Collectively, these articles represent an interesting range of perspectives and original studies that contribute to understanding the dynamic nature of sea level and its impacts across a wide range of time and space scales. Enjoy reading them!

There is no shortage of articles and books exploring women's underrepresentation in science. Everyone is interested--academics, politicians, parents, high school girls (and boys), women in search of college majors, administrators working to accommodate women's educational interests; the list goes on. But one thing often missing is an evidence-based examination of the problem, uninfluenced by personal opinions, accounts of "lived experiences," anecdotes, and the always-encroaching inputs of popular culture. This is why this special issue of *Frontiers in Psychology* can make a difference. In it, a diverse group

of authors and researchers with even more diverse viewpoints find themselves united by their empirical, objective approaches to understanding women's underrepresentation in science today. The questions considered within this special issue span academic disciplines, methods, levels of analysis, and nature of analysis; what these articles share is their scholarly, evidence-based approach to understanding a key issue of our time.
