Preservatives are not only necessary to stabilize our food supply; they play a crucial role in keeping our cosmetics safe. Many of us don't think about our cosmetics as products that can spoil or grow bacteria, fungi, and yeasts, but without the assistance of preservatives, our cosmetics could become harmful.

combination of ingredients, it provides broad-spectrum preservation for cosmetics as well as providing an excellent finish for your products. It is a great preservative for oil-based products, and for anyone who isn't bothered by synthetic preservation.

Synthetic & Natural Preservative For Cosmetics & Lotions

Preservatives play a very important function in products containing water: they kill microorganisms and water-borne bacteria, and prevent the growth of bacteria, mold and yeast. If a product contains water (including hydrosols, floral water and aloe vera juice, all of which contain water), a preservative is essential to help prevent microbes ...

5 Tips for Preserving Homemade & Natural Body Care Products

The adherence to current GMP and the use of appropriate packaging in combination with the control of crucial factors for the growth of microorganisms i.e. water activity (a_w) and pH can remarkably decrease the amount of traditional/chemical preservatives needed for the stability of a cosmetic formulation. In self preserving formulations, traditional preservatives have been replaced by other cosmetic ingredients with antimicrobial properties i.e. caprylyl glycol, glyceryl caprylate, etc ...
