The decision comes three months after the pop ... train more workers and lower costs for healthcare, childcare, education and housing. When the nonpartisan nonprofit WorkMoney surveyed more ...

What are the meanings, experiences, and impact of college for working-class people? The author of this book addresses the two questions, what is college like for working-class students, and what is college for the working class? In *The Other Three Percent*, the author draws on a wealth of previous research to tell the stories of five very different working-class college students as they apply to, enter, successfully navigate, and complete college. Through these stories readers will learn about the obstacles working-class students face and overcome, the costs and effectiveness of higher education as a mechanism of social mobility, and the problems caused on our college campuses by our reticence to meaningfully confront the class divide. Readers will be invited to compare their own experiences of higher education with those of the students here described, and to evaluate their own institutions' openness towards working-class students through a series of checklists provided in the book's conclusion. Allison L. Hurst is Assistant Professor in the Department of Sociology at Furman University in Greenville, South Carolina. She is a member of the Association of Working-Class Academics.

Higher education is in trouble. Commentators of all stripes bemoan escalating costs and diminishing quality. Solutions have been offered from all quarters, but tend to be piecemeal and all too often ideological. In this tough-minded look at the history, current climate, and future of university education in the United States, Melvyn L. Fein reexamines the mission of higher education and outlines what institutions can do to better prepare students for an ever more complex techno-commercial society. Fein argues that students must have the opportunity to explore and discover what works for them, and that the most important tool for institutions of higher education is self-direction. Professors must be allowed to teach in their own ways, bringing their own experience into the classroom. Since university missions differ, both universities and professors need the freedom to make decisions independently. The imminent need is for a "democratic elite" consisting of self-directed leaders who possess technical and social expertise, as well as personal motivation. The tools for change are appropriate curricula, communities of learners, and a genuine marketplace of ideas. While there is no magic bullet, Fein contends that we can and should build on the achievements of the past so as to evolve more responsive educational institutions—those that promote merit, responsibility, and universalism.

How race and class collide at a prestigious liberal arts college.

Over the past several decades, higher education has been transformed by the entry of faculty of color and women into the university system. Through detailed institutional ethnographies of three very different universities, *Privilege and Diversity in the Academy* explores how this diversification has dismantled and reconfigured relationships of privilege and diversity in higher education. Authors Maher and Tetreault use examples from a top-ranked private university, a comprehensive urban university, and a major public university to illustrate how privilege is enacted, resisted, and transformed as changes occur in the student bodies and faculties of these schools. In their analyses, they identify the institutional structures that facilitate the success of a diverse faculty and make valuable observations about patterns of institutional change and resistance.

Every 3rd issue is a quarterly cumulation.

In a provocative challenge to Republican conventional wisdom, two of the Right's rising young thinkers call upon the GOP to focus on the interests and needs of working-class voters.Grand New Party lays bare the failures of the conservative revolution and presents a detailed blueprint for building the next Republican majority. Blending history, analysis, and fresh, often controversial recommendations, Ross Douthat and Reihan Salam argue that it is time to move beyond the Reagan legacy and the current Republican power structure. With specific proposals covering such hot-button topics as immigration, health care, and taxes, Grand New Party shakes up the Right, challenges the Left, and confronts the changing political landscape.

'How to combine the community, the market, and the state in the total economic system is probably the most important agenda for economists geared towards the reduction of poverty in developing economies'. - Professor Yujiro Hayami This volume brings together leading scholars from all around the world to examine and extend Professor Hayami's development model of 'community, market and state', and to pay tribute to his invaluable contribution to economics. The authors provide new empirical analysis with a clear focus on the role of the community in economic development, and its relations with agricultural markets, industrialization and the government, using primary data from major countries in Asia and Africa. This book is indispensable reading for all interested in development economics, government and market studies and international development studies.

This narrative about the research journey explores the motivation to study practices of environmental education and the privilege that supports the authors ability to do so.
