DWP: 134,000 people entitled to £8,900 pay out after state pensions blunder

The Department for Work and Pensions (DWP) estimates that it underpaid 134,000 pensioners and those it can trace will be paid an average of £8,900, the National Audit Office (NAO) said.

With the rapid development of China ' s insurance industry and the opening of the Chinese insurance market to the world, Chinese insurance law and regulation has become an increasingly relevant topic for insurance practitioners and academics. The Regulation of

Read Book Quality Urance Office Audit Procedure

Insurance in China therefore provides a much needed analysis of the Chinese regulatory system. This is the first systematic text written in English on the regulation of insurance in China and provides a comprehensive and systematic analysis of rules of law and administrative regulations on China ' s insurance industry and insurance market, covering four level of regulatory hierarchy - the statutory law, the regulations enacted by the central government (the State Council), the regulations developed by the insurance supervision and regulation authority of the State Council, and self-regulations by the insurance industry. This book is essential reading for insurance companies and legal practitioners looking to do business in China, as well as reference for lawyers

practising insurance law. It is also a useful resource for students and academics studying Chinese law.

This User ' s Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve

Many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User ' s Guide was created by
