cannot possibly work for their needs. This book offers a solid structure to help the customer accurately state their needs, decide on what to purchase, and then finally configure it into a properly running system.

The annual Hot Interconnects conference is devoted to the architecture and implementation of networking technologies. The proceedings of the ninth conference, held in Stanford, CA, in August 2001, includes 25 papers in the realms of packet scheduling and classification; high-speed interconnects; network attached storage and memory; network protocol design and evaluation; switch design and architecture; and interconnect and circuit technologies. It also provides summaries of four tutorials on MPLS for traffic engineering; InfiniBand architecture; Bluetooth 802.11;
