With 41 slated for production in 1995, the Mirage was expected to account for 40 percent of Piper's total anticipated sales of 173 airplanes and outsell every other model that the company was producing. It was Piper's strongest player in its effort to recover from bankruptcy, and it's still more popular than ever. Piper Malibu Mirage

Larry Grant bought the very first production Malibu. And he's still flying it today. In early 2018, I was cleaning out years of documents from file cabinets in my Kansas City based office. Among them were original brochures from years of Piper production aircraft with an emphasis on Malibus, Mirages and Meridians.

The Malibu M-Class Owners & Pilots Association (MMOPA) is a not-for-profit organization dedicated to the interests and safety of owners and pilots worldwide who fly PA46 derivative (Malibu, Mirage, Meridian, M-Class, JetPROP and Matrix) aircraft. MMOPA was founded in 1988, and now serves over 1000 members.

Mirage pilots pay more at the gas pumps but in exchange, they go a little faster, with speeds typically of 220 knots at FL230-250 at 75 percent power burning 18.8 GPH. Owners of both models say they can fly 1100-NM trips with IFR reserves. But we have our doubts about the fuel-guzzling Mirage matching range with the Malibu in real-world conditions.
